< > ≡

Type Selector

Select elements by their type

A

Selects all elements of type `A`. Type refers to the type of tag, so `<div>`, `<p>` and `` are all different element types.

Examples

`div` selects all `<div>` elements.

`p` selects all `<p>` elements.

Select the bento boxes

Help, I'm stuck!

CSS Editor

style.css

HTML Viewer

table.html

```
1 bento
2 {
3   /* Styles would go here. */
4 }
5
6 /*
7  Type a number to skip to a level.
8  Ex → "5" for level 5
9  */
```

```
1 <div class="table">
2   <bento />
3   <plate />
4   <bento />
5 </div>
```

Type Selector

Select elements by their type

A

Selects all elements of type `A`. Type refers to the type of tag, so `<div>`, `<p>` and `` are all different element types.

Examples

`div` selects all `<div>` elements.

`p` selects all `<p>` elements.

Select the fancy plate

Help, I'm stuck!

CSS Editor

style.css

HTML Viewer

table.html

```
1 #fancy|
2 {
3 /* Styles would go here. */
4 }
5
6 /*
7 Type a number to skip to a level.
8 Ex → "5" for level 5
9 */

10
11
12
13
14
15
16
17
18
19
20
```

ID Selector

Select elements with an ID

#id

Selects the element with a specific `id`. You can also combine the ID selector with the type selector.

Examples

#cool selects any element with `id="cool"`

ul#long selects `<ul id="long">`

Select the apple on the plate

CSS Editor

style.css

HTML Viewer

table.html

```
1 plate apple
2 {
3   /* Styles would go here. */
4 }
5
6 /*
7  Type a number to skip to a level.
8  Ex → "5" for level 5
9  */
10

12
13
14
15
16
17
18
19
20
```

Descendant Selector

Select an element inside another element

A B

Selects all **B** inside of **A**. **B** is called a descendant because it is inside of another element.

Examples

p strong selects all **** elements that are inside of any **<p>**

#fancy span selects any **** elements that are inside of the element with **id="fancy"**

Select the pickle on the fancy plate

CSS Editor

style.css

HTML Viewer

table.html

```
1 #fancy pickle
2 {
3   /* Styles would go here. */
4 }
5
6 /*
7  Type a number to skip to a level.
8  Ex → "5" for level 5
9  */

18
19
20
```

Level 5 of 32 ✓

Combine the Descendant & ID Selectors

#id A

You can combine any selector with the descendant selector.

Examples

#cool span selects all elements that are inside of elements with id="cool"

Select the small apples

CSS Editor

style.css

HTML Viewer

table.html

```
1 .small|
2 {
3   /* Styles would go here. */
4 }
5
6 /*
7   Type a number to skip to a level.
8   Ex → "5" for level 5
9   */
10
11
12
13
14
15
16
17
18
19
20
```

```
1 <div class="table">
2   <apple />
3   <apple class="small" />
4   <plate>
5     <apple class="small" />
6   </plate>
7   <plate />
8 </div>
9
10
11
12
13
14
15
16
17
18
19
20
```

Class Selector

Select elements by their class

.classname

The class selector selects all elements with that class attribute. Elements can only have one ID, but many classes.

Examples

.neato selects all elements with

class="neato"

Select the small oranges

CSS Editor

style.css

HTML Viewer

table.html

```
1 orange.small{
2 {
3 /* Styles would go here. */
4 }
5
6 /*
7 Type a number to skip to a level.
8 Ex → "5" for level 5
9 */
```

```
1 <div class="table">
2   <apple />
3   <apple class="small" />
4   <bento>
5     <orange class="small" />
6   </bento>
7   <plate>
8     <orange />
9   </plate>
10  <plate>
11    <orange class="small" />
12  </plate>
13 </div>
```

Combine the Class Selector

`A.className`

You can combine the class selector with other selectors, like the type selector.

Examples

`ul.important` selects all `` elements that have `class="important"`

`#big.wide` selects all elements with `id="big"` that also have `class="wide"`

Select the small oranges in the bentos

You can do it...

Put your back into it!

Combine what you learned in the last few levels to solve this one!

CSS Editor

style.css

HTML Viewer

table.html

```
1 bento orange.small|
2 {
3   /* Styles would go here. */
4 }
5
6 /*
7  Type a number to skip to a level.
8  Ex → "5" for level 5
9  */
10
11
12
13
14
15
16
17
18
19
20
```

enter

```
1 <div class="table">
2   <bento>
3     <orange />
4   </bento>
5   <orange class="small" />
6   <bento>
7     <orange class="small" />
8   </bento>
9   <bento>
10    <apple class="small" />
11  </bento>
12  <bento>
13    <orange class="small" />
14  </bento>
15 </div>
16
17
18
19
20
```

Select all the plates and bentos

CSS Editor

style.css

HTML Viewer

table.html

```
1 plate, bento
2 {
3   /* Styles would go here. */
4 }
5
6 /*
7  Type a number to skip to a level.
8  Ex → "5" for level 5
9  */
10
11
12
13
14
15
16
17
18
19
20
```

enter

```
1 <div class="table">
2   <pickle class="small" />
3   <pickle />
4   <plate>
5     <pickle />
6   </plate>
7   <bento>
8     <pickle />
9   </bento>
10  <plate>
11    <pickle />
12  </plate>
13  <pickle />
14  <pickle class="small" />
15 </div>
16
17
18
19
20
```

Comma Combinator

Combine, selectors, with... commas!

A, B

Thanks to Shatner technology, this selects all `A` and `B` elements. You can combine any selectors this way, and you can specify more than two.

Examples

`p, .fun` selects all `<p>` elements as well as all elements with `class="fun"`

`a, p, div` selects all `<a>`, `<p>` and `<div>` elements

Select all the things!

CSS Editor

style.css

HTML Viewer

table.html

```
1 *  
2 {  
3   /* Styles would go here. */  
4 }  
5  
6 /*  
7   Type a number to skip to a level.  
8   Ex → "5" for level 5  
9   */  
10  
11  
12  
13  
14  
15  
16  
17  
18  
19  
20
```

```
1 <div class="table">  
2   <apple />  
3   <plate>  
4     <orange class="small" />  
5   </plate>  
6 <bento />  
7 <bento>  
8   <orange />  
9 </bento>  
10 <plate id="fancy" />  
11 </div>  
12  
13  
14  
15  
16  
17  
18  
19  
20
```

The Universal Selector

You can select everything!

`*`

You can select all elements with the universal selector!

Examples

`p *` selects any element inside all `<p>` elements.

Select everything on a plate

CSS Editor

style.css

HTML Viewer

table.html

```
1 plate *
2 {
3   /* Styles would go here. */
4 }
5
6 /*
7  Type a number to skip to a level.
8  Ex → "5" for level 5
9  */
10
11
12
13
14
15
16
17
18
19
20
```

enter

```
1 <div class="table">
2   <plate id="fancy">
3     <orange class="small" />
4   </plate>
5   <plate>
6     <pickle />
7   </plate>
8   <apple class="small" />
9   <plate>
10     <apple />
11   </plate>
12 </div>
13
14
15
16
17
18
19
20
```

Combine the Universal Selector

A *

This selects all elements inside of A .

Examples

p * selects every element inside all <p> elements.

ul.fancy * selects every element inside all <ul class="fancy"> elements.

Select every apple that's next to a plate

CSS Editor

style.css

HTML Viewer

table.html

```
1 plate + apple
2 {
3   /* Styles would go here. */
4 }
5
6 /*
7  Type a number to skip to a level.
8  Ex → "5" for level 5
9  */
10
11
12
13
14
15
16
17
18
19
20
```

enter

```
1 <div class="table">
2   <bento>
3     <apple class="small" />
4   </bento>
5   <plate />
6   <apple class="small" />
7   <plate />
8   <apple />
9   <apple class="small" />
10  <apple class="small" />
11 </div>
12
13
14
15
16
17
18
19
20
```

Adjacent Sibling Selector

Select an element that directly follows another element

A + B

This selects all **B** elements that directly follow **A**. Elements that follow one another are called siblings. They're on the same level, or depth.

In the HTML markup for this level, elements that have the same indentation are siblings.

Examples

p + .intro selects every element with **class="intro"** that directly follows a **<p>**

div + a selects every **<a>** element that directly follows a **<div>**

Select the pickles beside the bento

CSS Editor

style.css

HTML Viewer

table.html

```
1 bento ~ pickle
2 {
3   /* Styles would go here. */
4 }
5
6 /*
7  Type a number to skip to a level.
8  Ex → "5" for level 5
9  */
10
11
12
13
14
15
16
17
18
19
20
```

enter

```
1 <div class="table">
2   <pickle />
3   <bento>
4     <orange class="small" />
5   </bento>
6   <pickle class="small" />
7   <pickle />
8   <plate>
9     <pickle />
10  </plate>
11  <plate>
12    <pickle class="small" />
13  </plate>
14 </div>
15
16
17
18
19
20
```

General Sibling Selector

Select elements that follows another element

A ~ B

You can select all siblings of an element that follow it. This is like the Adjacent Selector (A + B) except it gets all of the following elements instead of one.

Examples

A ~ B selects all B that follow a A

Select the apple directly on a plate

CSS Editor

style.css

HTML Viewer

table.html

```
1 plate > apple
2 {
3   /* Styles would go here. */
4 }
5
6 /*
7  Type a number to skip to a level.
8  Ex → "5" for level 5
9  */
10
11
12
13
14
15
16
17
18
19
20
```

enter

```
1 <div class="table">
2   <plate>
3     <bento>
4       <apple />
5     </bento>
6   </plate>
7   <plate>
8     <apple />
9   </plate>
10  <plate />
11  <apple />
12  <apple class="small" />
13 </div>
14
15
16
17
18
19
20
```

Child Selector

Select direct children of an element

A > B

You can select elements that are direct children of other elements. A child element is any element that is nested directly in another element.

Elements that are nested deeper than that are called descendant elements.

Examples

A > B selects all B that are a direct children
A
